CORA
COOKIE ✔ CHECK

Management of cookie and tracking technologies.

CORA COOKIE CHECK is part of the **GRC CORA** solution, a multi-compliance software platform that allows you to manage, in a single synergistic system, more regulations, binding and non-binding, optimizing the time of implementation and management. The modules can be activated independently. Upon activation, the new module will inherit the information it has in common with the other elements already operational. **GRC CORA** is available in **SaaS** and **OnPremise** mode to better accommodate the needs of each customer.

The regulatory environment

Companies that install profiling cookies are required to collect the consent of users (having the requirements under **art. 7 of the GDPR**) and provide the privacy policy, with which to make transparent, inter alia, the purposes for which the data are processed or transmitted to third parties. Where processing is based on consent, they must be able to prove that they have obtained consent and retain evidence.

This is a very expensive work for organizations, because for each non-technical cookie and for each script provided by third parties it is necessary to involve **different areas of the organization** (e.g. technical area, legal, marketing, etc.).

COOKIE CHECK allows you to comply with the European Data Protection Board (**EDPB**) **Consent Guidelines and the Data Protection Authority's instructions**.

The solution

The adoption of **CORA COOKIE CHECK** allows you to:

- Identifying associated **Purposes and drafting** the related privacy policy and cookie policy;
- Keep the execution of all scripts blocked until the user's consent is collected;
- If the user provides partial consent, only allow the execution of scripts for which consents related to the purposes used have been collected, keeping the scripts (or portions of scripts) blocked using purposes for which you have not given your consent.

Benefits

- Fast and scalable, as well as very fast in communicating the status of consent;
- The execution of the cookie banner needs to insert the JS SDK on the page, making integration simple;
- Multidisciplinary approach among development experts, designers and lawyers;
- Installation both On Premises and On SaaS architecture already realized;
- UXD simple and effective, to be available from the first visit;
- End-to-end solution customized on the customer.

Designed by Jump
Integrated by Compet-e

jump

CORA COOKIE CHECK comes from the shared skills of Jump Group and Compet-e.

It offers a complete solution for website and app compliance with GDPR and cookie regulations.

CORA
COOKIE ✔ CHECK

Management of cookie and tracking technologies.

In short

Customizable banner and user-friendly dashboard for storing consents

Web server module to automate the preventive blocking

Data Analytics: the solution integrates with existing third-party systems (e.g. Google Analytics)
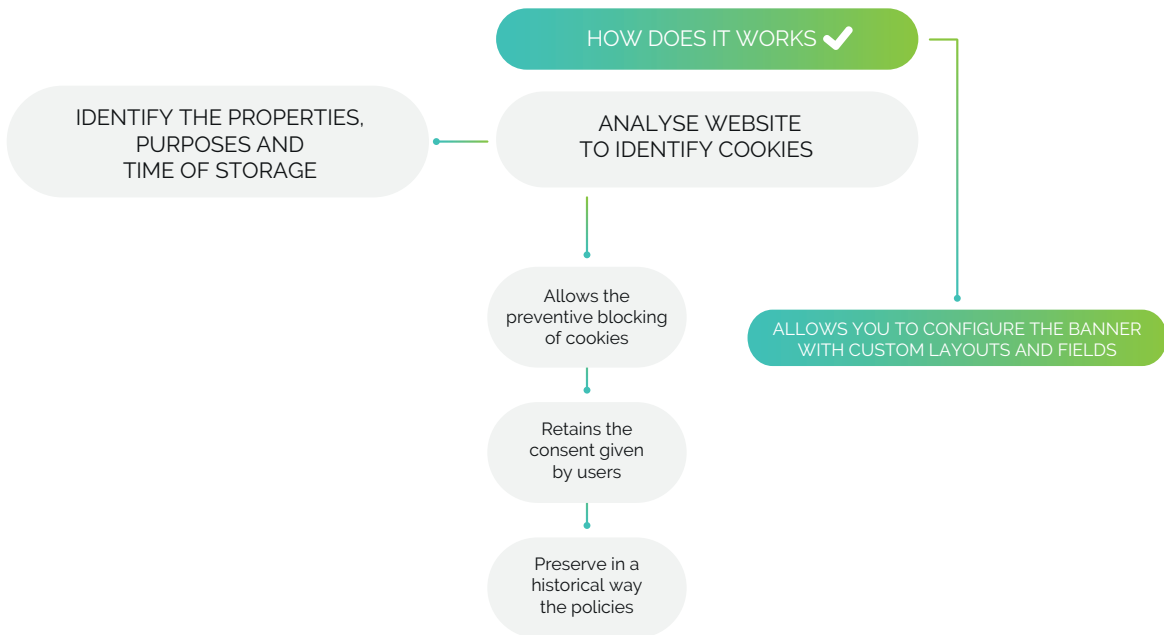

Cross-device, cross-browser compatible

Determines whether a user has been verified with the "double opt-in", stores the consents provided by each user on different platforms

Historization of policies. For each consent, it keeps track of the cookie policy that the user has read

HOW DOES IT WORKS ✔

IDENTIFY THE PROPERTIES, PURPOSES AND TIME OF STORAGE

ANALYSE WEBSITE TO IDENTIFY COOKIES

Allows the preventive blocking of cookies

ALLOWS YOU TO CONFIGURE THE BANNER WITH CUSTOM LAYOUTS AND FIELDS

Retains the consent given by users

Preserve in a historical way the policies

A simple, complete, scalable compliance suite.

CORA COOKIE CHECK is part of the GRC CORA solution.

GRC CORA is a customizable and modular solution according to the specific needs of each reality.
